

UKSPF Coveris

Funded by
UK Government

Cheshire West
and Chester

BACKGROUND

Coveris is a leading European packaging company specialising in flexible and sustainable solutions for various industries. They focus on developing packaging that safeguards products across sectors like food, pet food, medical devices, and industrial goods, aiming to extend product lifecycles and reduce waste. At their Winsford site, they've established a Green Team to advance their sustainability goals, resulting in significant CO2 savings and recognition for their efforts globally.

WHAT WE DID

Groundwork were the appointed delivery partner for Cheshire West and Chester for this grant programme. We supported Coveris Winsford on their grant application progress by;

- Conducting a site visit to review all their energy consumption measures, from lighting to equipment
- Calculating their carbon emissions, undertook a cost/benefit analysis
- Developed an action plan and business case for investment
- Supported Coveris Winsford with the grant application process

OUTCOMES

Following our support, Coveris Winsford was able to install LED lighting across all areas of their site, resulting in:

- £36,339 cost savings per year
- 48 tonnes of carbon saved per year

“Guidance and support was provided with good direction and clear information. The process was simple, and it delivered exactly what was promised. We would be extremely interested in taking part in further funding opportunities with the Groundwork Team”

Mike Richardson, Technical Director
