

# UKSPF Lady Heyes Holiday Park

Funded by  
UK Government

Cheshire West  
and Chester

## BACKGROUND

Lady Heyes is a privately owned holiday park offering Glamping pod and pitches for touring caravans, motorhomes and tents. The park is open all year round and hosts a range of facilities including leisure and retail units. Covering 14 acres, the site has evolved from a mid-20th Century agricultural business to a modern holiday park, hosting a variety of independent businesses including a vehicle garage, antiques centre, furniture shops, beauty treatments and general retail units. All units onsite comprise of modern energy efficiency components such as double glazing, underfloor heating and insulation.

## WHAT WE DID

Groundwork was appointed as the delivery partner for Cheshire West and Chester's UKSPF grant programme. We assisted Lady Heyes Holiday Park with their grant application process by:

- Conducting an on-site visit to assess building plans and energy consumption
- Calculated their carbon impact from their large electricity and gas usage
- Presented the business with an action plan and business case for solar PV investment
- Providing support throughout the grant application process

## OUTCOMES

With our support, Lady Heyes Holiday Park successfully installed an impressive 350 kWp solar PV system leading to:

- £67,345 in annual cost savings
- 70.5 tonnes of CO<sub>2</sub>e reduced per year
- Identified additional opportunities surrounding a full lighting replacement towards energy-efficient LEDs and voltage optimisation.

SUSTAINABLE  
BUSINESS
